November 8-9, 2017

VII International Partnering Forum “Life Sciences Invest. Partnering Russia” Will Take Place in Saint Petersburg

On November 8-9 Taleon Imperial Hotel in Saint Petersburg will host VII International Partnering Forum “Life Science Invest. Partnering Russia”. As usual, it will unite specialists in the field of “life sciences”, government officials, top managers and directors of leading companies in the industry.

The main mission of the Forum is to raise the status of the industry as a whole among other areas of economic and industrial development, prestige and importance of sectoral science and education, and draw attention to the quality of training of the specialists. The main task is to inform specialists, teachers, researchers of specialized universities and institutes, as well as schools with in-depth study of natural scientific disciplines on the latest trends in development of the pharmaceutical and medical industry. Experts from leading companies of the world and our country will share their vision of the industry development, main trends in research and development, perspectives for the development of technological platforms in the field of chemical and biological synthesis.

The focus of workshops and round tables is on cross-sectoral interaction and convergence of sciences, training of a wide range of specialists for all segments of the market for circulation of medicines and medical products, optimization of the entire ecosystem and regulation of pharmaceutical industry, prospects for harmonization with the global market and within the framework of the Eurasian Economic Union.

Participants and guests of the VII Forum will be provided with a unique communication platform that effectively integrates the largest market participants with the future of the industry - young professionals, students and professors of profile universities and schools. The framework of the Forum also stipulates signing of a number of agreements on cooperation and joint implementation of projects in the field of education and science, in particular with international companies, as well as awarding of the winners among the best students and teachers.

“How does the huge area of knowledge in the field of Life Sciences develop, how priorities in scientific research are transformed, what will be relevant in a few years, what are the challenges facing industry leaders? **Key speakers of the Forum have this understanding**”, says Zakhar Golant, Chairman of the Board of the Forum Organizer, “Medical-Pharmaceutical Projects. XXI Century” Union.

See more detailed information on registration and program of the Forum on the formal web-site www.lsipr.ru.
